

Product Code: CCA010D & CCA020D

Introduction

Emus BMS Top/Bot Isolators are cell communication adapters that provide optical isolation in applications where the main controller communicates directly to EMUS BMS Cell Modules. The Bot isolator connects between the main controller and the first cell of series-connected battery pack, while the Top Isolator provides isolating barrier between the last cell of series-connected battery pack and the main controller.

Applications

- Any lithium chemistry, series connected battery pack up to 80 cells

Features

- Reliable serial communication between cell modules
- TOP isolator code CCA010D
- BOT isolator code CCA020D
